Effective March 1,

Site licensing is available. Please call to learn how this can be implemented district-wide for an unbelievable price!

- The purpose of the **PRAC~TIS MATH®** is to provide multiple, printed practice materials for teachers to use with their students who need additional practice and review over specific math skills. This is intended to be a supplement to core curriculum materials.
- There are three components to the **PRAC~TIS MATH®**:
  - The first component is TEKS or Common Core aligned skills "*Practice Units*" that provide skills practice worksheets. A student copy with Teacher Answer Key can be printed and used for a group / class; or, the program will generate *different problems* covering the same skill(s). Use this feature hundreds of times and *never* repeat the same problem!
  - The second component is the "*Domain Review*." In this section, math skills are grouped in up to 6 Domains. Using this review, teachers can gain a broader overview of students' success rates with an entire domain. They will then know if students are ready to move on, or if there are individual skills that require additional remediation with individual Practice Units.
  - The third component is the "*Assessment Review*" of 40 to 52 problems that assesses students' skills comprehension. From this, teachers can identify which skills need additional remediation and immediately generate new problems from the Practice Units. This component also has the same tool functionality, i.e., to generate multiple tests never repeating the same problems.
- PRAC~TIS MATH® is Microsoft Excel® based
- **PRAC~TIS MATH® is available for PC and Mac**
  - CDs and Flash Drives for PCs
  - Flash Drives only for MACs
- Two ways to purchase PRAC~TIS MATH® CDs or flash drives:
  - Grades 3 - 9 Practice Units
  - Grades 2 - 7 Practice Units, Domains and Assessment Reviews
- PRAC~TIS MATH® was created by Texas Certified Math teachers

Digital Books is a platform that utilizes thousands of pages of Gourmet Learning’s Reading skills- based curriculum in order to help educators better serve the individual needs of each student. This is a web-based program. There’s no software to load, and updates are free. Digital Books allows you to access thousands of lessons across grade levels. This platform is a Response To Intervention, or R-T-I strategy addressing the needs of Tier 1, Tier 2, Tier 3, and Tier 4 students. In short – this tool will help you as an educator reach out to students performing below, at, or above their skills mastery level by putting differentiated instruction at your fingertips.

Digital Books for Math is currently unavailable. Gourmet Learning is offering a **NEW** product, *PRAC~TIS MATH*® to meet the needs for differentiated instruction and RTI. Please refer to this price list, page 5, for additional product and pricing information.
